D. M. Sugimura, Director

CITY OF SEATTLE ANALYSIS AND DECISION OF THE DIRECTOR OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT

Application Number: 3014987
Applicant Name: Paul Pierce for Andrew Fortier
Address of Proposal: 4249 NE 107th Street

SUMMARY OF PROPOSED ACTION

Land Use Application to subdivide one parcel into two parcels of land. Proposed parcel sizes are: A) 8,399 sq. ft. and B) 5,761 sq. ft. Existing structures are to remain.

The following approval is required:

Short Subdivision - to create two parcels of land.
(Chapter 23.24, Seattle Municipal Code).

BACKGROUND INFORMATION

Zoning: Single Family 7200 (SF7200)

Public Comment: Comment letters were received during and after the comment period which ended on May 22, 2013. The comments reflected concern over the impact on street parking, and traffic by an additional residence, and potential development on Parcel B, including changes to the existing neighborhood character. However, the scope of this review is limited to the subdivision of land only.

Site Description: The 14,160 square foot corner property abuts Sand Point Way NE and NE 107th St. The site is developed with an existing single family residence. The residence will be located on Parcel A and will be retained. Parcel B will have street frontage on both streets. Parcel A will have street access along NE 107th St. As well, a 12' wide Ingress and Egress easement off of Sand Point Way NE across Parcel B is for the benefit of Parcel A. The site does not abut an alley.

The site has its low point at the eastern corner and slopes upward approximately 8' to the high point at the front of the existing residence. There are no mapped or observed Environmentally Critical Areas (ECAs) or ECA buffers on the subject site.

ANALYSIS – SUBDIVISION

General short subdivision standards: Pursuant to SMC 23.24.040, the Director shall, after conferring with appropriate officials, use the following criteria to determine whether to grant, condition, or deny a short plat:

1. *Conformance to the applicable Land Use Code provisions, as modified by this chapter;*
2. *Adequacy of access for pedestrians, vehicles, utilities and fire protection as provided in Section 23.53.005, Access to lots, and Section 23.53.006, Pedestrian access and circulation;*
3. *Adequacy of drainage, water supply and sanitary sewage disposal;*
4. *Whether the public use and interests are served by permitting the proposed division of land;*
5. *Conformance to the applicable provisions of Section 25.09.240, Short subdivisions and subdivisions, in environmentally critical areas;*
6. *Whether the proposed division of land is designed to maximize the retention of existing trees;*
7. *Conformance to the provisions of Section 23.24.045, Unit lot subdivisions, when the short subdivision is for the purpose of creating separate lots of record for the construction and/or transfer of title of townhouse, rowhouse, and cottage housing developments as permitted in Single-Family, Residential Small Lot, and Lowrise zones and for single-family dwelling units in Lowrise zones, or any combination of the above types of residential development, as permitted in the applicable zones; and;*
8. *Conformance to the provisions of Section 23.24.046, Multiple single-family dwelling units on a single-family lot, when the short subdivision is for the purpose of creating two or more lots from one lot with more than one existing single-family dwelling unit.*
9. *Every lot except unit lots and lots proposed to be platted for individual live-work units in zones where live-work units are permitted, shall conform to the following standards for lot configuration, unless a special exception is authorized under subsection 23.24.040.B:*
 - a. *If a lot is proposed with street frontage, then one lot line shall abut the street for at least 10 feet; and*
 - b. *No lot shall be less than 10 feet wide for a distance of more than 10 feet as measured at any point; and*
 - c. *No proposed lot shall have more than six separate lot lines. The lot lines shall be straight lines, unless the irregularly shaped lot line is caused by an existing right-of-way or an existing lot line; and*
 - d. *If the property proposed for subdivision is adjacent to an alley, and the adjacent alley is either improved or required to be improved according to the standards of Section 23.53.030, then no new lot shall be proposed that does not provide alley access, except that access from a street to an existing use or structure is not required to be changed to alley access. Proposed new lots shall have sufficient frontage on the alley to meet access standards for the zone in which the property is located.*

Analysis

The applicant used an exception from minimum lot area known as the “75/80 rule” per SMC23.44.010.B.1.a.2 to propose short platting the lot into two parcels. The applicant submitted a list of properties along the southern blockface of NE 107th St. between Sand Point Way NE and Bartlett Ave NE., listing 3 parcels within the Single Family zone. The subject property is not included in calculating the existing average lot area when using the 75/80 rule for a short plat. When using the 75/80 rule on a corner lot, the applicant may choose which blockface to use.

Three parcels were used in the calculations of the 75/80 rule. To meet 75% of the SF7200 zone a lot minimum of 5,400 square feet is required. To meet 80% of the average lot size of the blockface a minimum of 5,760 square feet is required. The proposed parcels meet both these requirements.

Conclusion

Based on information provided by the applicant, referral comments from DPD and other City Departments, and review and analysis by the Land Use Planner, the above criteria have been met. The short subdivision meets all minimum standards or applicable exceptions set forth in the Land Use Code. This short subdivision will provide pedestrian and vehicular access (including emergency vehicles), and public and private utilities. Adequate provisions for drainage control, water supply and sanitary sewage disposal will be provided for each lot and service is assured, subject to standard conditions governing utility extensions. The public use and interest are served by the proposal since all applicable criteria are met and the proposal creates the potential for additional housing opportunities in the City.

DECISION –SHORT SUBDIVISION

The proposed Short Subdivision is **GRANTED**.
